EXCAVATORS

WAIN-ROY® excavator bucket attachments are the undisputed champions of moving earth and materials. Manufactured from 100% steel, the durability and versatility of our buckets make them perfect for conquering any job in any conditions. The more work they take on, the better they look.

EXCAVATOR BUCKETS

- / Internal struts and corner gussets for superior strength and rigidity without impeding product flow.
- / Designed to OEM pin-up specifications.
- / Side cutter insert and cutting edge notched for a larger, stronger, and more rigid attaching joint.

GRAPPLES

- / All exposed welds protected against wear.
- / Hardened pressed bushings for a long work life.
- / Stiff and hydraulic cylinder mounts available.
- / Constructed of wear resistant material.
- / Available in heavy-duty, general purpose, and light-duty designs.
- / Standard product offering covers 12MT to 45MT class machines.

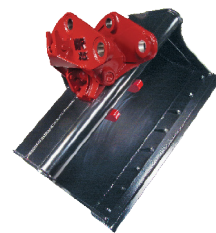

THUMBS

- / Engineered for bulk material handling.
- / Several product arrangements are available with different tine styles to meet specific job requirements.
- / Styles include mechanical (weld-on and direct pin) or hydraulic (weld-on, direct pin, and progressive link).
- / Constructed of T1 material.

SWINGER COUPLER BUCKET

Ideal for ditch cleaning, grading, backfilling, and loose material handling. Tilting buckets also available.

02

COMPACT EXCAVATORS

WAIN-ROY® compact excavator attachments combine durability and toughness with added versatility in buckets, rippers, couplers, and clamps. But just like their full-size companions, the more you put them to the test, the stronger they look.

JAW BUCKET

Available in Quick Change or pin-on mounts for TLB to 20MT hydraulic excavators. Leverage the machine's lifting capabilities and operator versatility with a W-R Jaw bucket — clamping forces range from 5,900 to 8,700 lbs over the product range.

RIPPER BUCKET

The original W-R ripper buckets are engineered to tackle the toughest ripping jobs such as limestone, caliche, shale, or coral. Available in quick change or pin-on mounts for TLB to 80MT class hydraulic excavators.

BUCKET AND HYDRAULIC THUMBS

Thumbs are used in conjunction with a bucket as an efficient method to handle bulk material.

03

MINING AND MASS EXCAVATION

Wain-Roy®/Central Fabricators loader buckets come with an earned 20-year reputation and fame for getting the job done. Designed to absorb as much punishment as they dish out, these buckets deliver high productivity and high durability, and are rebuildable in extreme-duty applications. Decades of manufacturing expertise have informed reinforcing welds to prevent erosion, which means you can depend on the unparalleled strength and extended life of Wain-Roy®.

**04**

TRACTOR LOADER BACKHOE

Wain-Roy® strength and adaptability come together in our line of pin grabber couplers and loader buckets. Increase your productivity and add versatility to any jobsite with equipment that is resilient enough to handle a wide range of work environments, from landscaping to bridge repairs and utility jobs. Work, meet workhorse.

LOADER BUCKETS

- / Choose from low profile, long and short bottom buckets.
- / Utility and high-capacity, light material buckets available.
- / Heavy-duty construction for a long work life.
- / General purpose and high capacity buckets are offered with various hardware arrangements and capacities to match the job at hand.

COUPLER

- / Direct pin and quick latch models.
- / Available in both mechanical and hydraulic styles.
- / Optional jump latches adapt to any machine, any attachment, different MT size classes, and competitive pin geometries.

05

WHEEL LOADERS

Wain-Roy® loader buckets' heavy duty design makes them equipped for delivering superior strength and performance on jobsites. With 100% steel buckets capable of moving everything from compost to boulders and loader quick couplers providing stability and quick-connect capability, you'll win the battle of earth versus machine with ease.

WHEEL LOADER BUCKETS

- / Light material and multi-purpose styles are available.
- / Choose from coupler and pin-on models.
- / Bolt-on cutting edges and teeth are replaceable.
- / Straight and spade nose edge designs are available.

06

SKID STEER & HYDRAULIC

Wain-Roy® augers, pallet forks, and rock wheels make it possible to deliver a knockout blow to any job. Our auger models are perfect for every application, hole size, ground condition, and skid steer, whether you're standard drilling or boring through abrasive soil or rock. Pallet forks deliver strength and stability with forged steel tines and a center load point. Rock wheels will replace any overpriced concrete cutting machine on your site with upgraded torque and power performance. Our root and scrap grapples will move any worksite debris with ease. From rocks and timber to construction or demolition materials, keep your jobsite tidy with Wain-Roy® grapples.

AUGERS

- / Four models rated from 15 to 45 gpm.
- / Motor / planetary gearbox design.
- / Two-inch hex or 2-9/16-inch round output shaft.

PALLET FORKS

- / Designed for use on skid steer loaders and compact tractor loaders.
- / Universal Quick Attach coupler system for easy attaching.
- / Certified, forged steel fork tines (150 Class 2A) for long life.

ROCK WHEELS

- / Models from 12- to 24-inch cutting depths.
- / Includes double reduction planetary drives.
- / Electro-hydraulic controls adjust depth and sideshift auxiliary functions.
- / Exclusively available in high-flow models.

ROOT AND SCRAP GRAPPLES

- / Models from 65- to 86-inch widths.
- / Root grapples let dirt sift through when loading rocks, trash, and other loose material.
- / Twin hydraulic cylinders allow for independent clamping on uneven material while cylinder placement improves visibility.
- / Standard cylinder guards protect rods and hoses for longer life.

07

TRACTOR THREE-POINT

Wain-Roy®/Gannon box scrapers are the standard of the construction industry. With strong, wear-resistant cutting edges and rugged steel manufacturing, leveling the field has never looked easier – or better. When it's time to even the odds, even them with Wain-Roy® box scrapers.

GANNON BOX SCRAPERS

- / Heavy-duty hydraulic scrapers, 65- to 96-inch widths.
- / Hydraulic operated scarifier bar is easy to use.
- / Category 1 & 2 three-point hitch.

THE ORIGINAL *WainRoy*

BORN FROM INNOVATION

After experimenting with a hydraulic digging apparatus, Vaino J. Holopainen and Roy E. Handy filed Patent No. 2,698,697, inventing the world's first tractor-mounted backhoe. They founded Wain-Roy® in 1948 and got to work developing innovation after innovation, establishing us as the industry leader in tractor-mounted attachments. And by uniting the history and heritage of Alitec™, Central Fabricators, and Gannon® under the Wain-Roy banner, we're made even stronger and more versatile.

We wear our resume on everything we make – the scrapes and scars etched into the surface of our products tell the story of battles overcome on the job site. We've literally carved out our reputation in the work that material movers do every day, becoming synonymous with material moving. Often imitated but never truly replicated, we are the originators of conquering earth's toughest terrain. **We are Wain-Roy.**

BORN TO GET DIRTY
